ST JOSEPH'S RC PRIMARY SCHOOL

Our Post Inspection Action Plan

A guide for parents and carers | 2026–2028

Following our Estyn inspection, we have identified four priorities. Here are the main steps we will take to improve children's learning and experiences.

01 Strong leadership and improvement

We will check carefully what is working and what needs to improve.

- Regularly visit lessons, look at children's work and listen to pupils.
- Provide training and coaching for school staff.
- Work with governors to check the impact of improvements.

02 Consistently good teaching

We will make sure children receive the right support and challenge.

- Agree clear expectations for teaching in every classroom.
- Improve behaviour routines and purposeful learning environments.
- Use assessment and feedback to help every child make progress.
- Strengthen support for children with additional learning needs.

03 Developing essential skills

We will help children build their skills as they move through school.

- Improve writing, with a focus on punctuation and grammar.
- Develop maths, reasoning and problem-solving across subjects.
- Plan more opportunities to use digital skills safely and confidently.
- Make sure learning builds on what children already know.

04 Improving attendance

We will work with families to help children attend regularly.

- Check attendance carefully and identify where help is needed.
- Work with families and the attendance support team.
- Celebrate good attendance and encourage punctuality.
- Provide targeted support, particularly for pupils eligible for free school meals.

We will share progress through newsletters, meetings and parent surveys.
